

While using the Laptop on Batteries and when there is no A/C power:

last updated 2010-03-25 by Anil

1. Turn off Wi-Fi and BlueTooth.
2. Don't play computer games, music or DVD movies - Multimedia activities drain laptop batteries.
3. Disconnect all external device like PC Card modems, Firewire, USB devices and optical drives.
 - Use the notebook touchpad instead of an external mouse.
4. Adjust your screen brightness - Dimming your display saves battery power.
5. Choose a Laptop power scheme that turns off the notebook monitor and hard disk after 5 minutes of inactivity.
6. Decrease or mute the Laptop Speaker Volume.
7. Turn off all scheduled tasks.
8. Turn off Auto-save features in Microsoft Office and other applications.
9. If your PC has a built-in wireless card, turn it off or disable it when not in use.
10. Programs that are run from a CD or DVD can be copied to and run from the hard drive, which typically consumes less power than an optical drive.
11. Let the battery fully discharge once a month so that there is good flowing of battery juice.
